

IMPORTANT INFORMATION REGARDING YOUR INSURANCE COVERAGE

February 2018

Metropolitan Medical Laboratory, PLC has taken great pride in providing up-to-date information to our clients and patients. From current testing to new testing to general information about our patient service centers, we do our best to avoid unwanted surprises.

Metro Lab typically will post a list of insurance companies that we have negotiated a contract with, which is almost every insurance vendor and their associated plans.

This year, many of the vendors appear to have multiple levels of coverage under one plan name. While this may be good for the consumer, it does present a problem in providing an up-to-date list that may include hundreds if not thousands of plans.

Metro Lab recommends that in order to get a full understanding of their particular coverage, each policy holder should contact their carrier via their website or by calling the toll free number on the card to speak with a representative. Having that knowledge will help the policy holder understand the Explanation of Benefits, (EOB) when the insurance card is used, and any financial obligation of the policy holder.

Thank you for your continued support.
